

## USING VAPOR BARRIER TO PROTECT WATER METER

↑ N  
1" = 20'

### Options

- 1) Vapor barrier protects water meter from septic system. It is important to note that **D1** plus **D2** should equal a minimum of 25'.
- 2) A **concrete encased** water line allows for a minimum distance of 10' from the septic system.

VAPOR BARRIER DETAIL

\* Bring to the depth of trench(es) or Pipe & Gravel absorption field, if applicable.
