

Health cards are so last year.

Barbers

Even though you are no longer required to get a health card, Nevada law* still requires licensed barbers and apprentices to get a chest X-ray for tuberculosis and a blood test for communicable diseases.

You can visit your primary care doctor for the required medical tests. If you don't have a primary care doctor, you can go to a clinic that offers TB testing. (Download a list of clinics that offer TB testing at <http://www.southernnevadahealthdistrict.org/download/health-cards-tb-testing-locations.pdf> or go to one of our public health centers for a handout.)

While vaccinations are no longer required, the health district recommends you keep vaccinations current to protect yourself, your clients and your family.

**Nevada Revised Statutes 643.070 and 643.080;
Nevada Administrative Code 643.*
